A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/23/02 has been entered.

Claims 24-46 and 48-51 are being examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 48 and 50 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 49 and 50 as now written fail to disclose the miscibility or solubility of the second organic solvent in water. According the invention in the as filed specification, the second organic solvent must have "limited miscibility or solubility with water". The invention of claims 49 and 50 broadens the scope of the disclosed invention, since the nature and properties of the chemicals recited are unidentified. For example, acetone is a water soluble ether. The claim recites "ether" or "ester".

Therefore, this material raises the issue of new matter and should be deleted.

Claims 24-46 and 48-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 40 and 51 encompass an improper Markush grouping because "n-propyl", "t-butyl" and "isobutyl" are not properly "second organic solvents". Also the Markush grouping is improper in the use of two "and" clauses in the listing. The proper format is e.g. selected from

the group consisting of A,B, AND C. The claims as drafted do not follow this form. See MPEP 2173.05(h)(a). It is recommended that the term -acetate- be added as appropriate.

Claim 44 is vague and indefinite in that the proper antecedent basis for "said organic solvent" is lacking. The solvent is designated as "second organic solvent".

Claim 46 provides for the use of a process, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 46 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claims 24, 36 and 40 use the phrase "from an organic solvent having limited miscibility with water". However, "limited" is a term of reference without an adequate point from which to compare the "limits" of miscibility. Applicants cite references in support of their position. However, these references are not available to the examiner.

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

Applicants cite various references in support of their position that the terminology "limited miscibility with water" pertains to solvents which are neither miscible nor immiscible with water. However, copies of the references cited are not provided. These references are not readily available to the examiner.

Therefore the rejection is deemed proper and it is adhered to.

The claims are free of the art of record. Claims 49 and would be allowable upon resolution of all 35 U.S.C § 112 issues.

No claim is allowed.
